| <b>Sampling method</b>        | Respondents were selected from YouGov's opt-in panel to be representative of adult U.S. citizens.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| <b>Sample composition</b>     | 1,827 started the survey after screenouts. 137 were deleted due to breakoffs, 29 were removed for interview completion time under 5 minutes, 10 were removed for attention check failures, and 47 were removed for data quality control. The reporting is based on the remaining 1,604 respondents.                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>Weighting</b>              | The sample was weighted according to gender, age, race, education, 2024 election turnout and presidential vote, 2020 election turnout and presidential vote, baseline party identification, and current voter registration status. 2024 presidential vote, at time of weighting was estimated to be 48% Harris and 50% Trump. Demographic weighting targets come from the 2019 American Community Survey. Baseline party identification is the respondent's most recent answer given around November 8, 2024, and is weighted to the estimated distribution at that time (31% Democratic, 32% Republican). The weights range from 0.051 to 5.52, with a mean of one and a standard deviation of 0.861. |
